| Not able to complete questionnaire                                       | 0/806 (0.0%)        | -                  | -               | -                  | -                 | 0/111 (0.0%)      |
| Medical record abstracted <sup>2</sup>                                   | -                   | -                  | -               | -                  | -                 | -                 |
| Question of interest collected <sup>3</sup>                              | -                   | -                  | -               | -                  | -                 | -                 |
| Missing ability to complete questionnaire                                | 45/806 (5.6%)       | -                  | -               | -                  | -                 | 7/111 (6.3%)      |

<sup>1</sup>If participant was missing cohort, or enrolled at a community venue and missing age, or enrolled at a nursing home and missing a response to whether they were able to complete the questionnaire, it is not possible to determine which Questionnaire or Medical Record Abstraction CRF should have been completed.

<sup>2</sup> Defined as a Questionnaire CRF (or Medical Record Abstraction CRF, as appropriate) with a non-missing 'Date of questionnaire administration'.

<sup>3</sup> Defined as a non-missing response to the question 'in the past month, have you interacted in person or through direct physical contact, such as touching, hugging, or shaking hands, with someone who recently tested positive for COVID-19?'

| Questionnaire collected <sup>2</sup>                                     | -                 | -                   | 47/47 (100.0%)    | 373/374 (99.7%)               |
| Question of interest collected <sup>3</sup>                              | -                 | -                   | 45/47 (95.7%)     | 372/374 (99.5%)               |
| Not able to complete questionnaire                                       | -                 | -                   | 0/47 (0.0%)       | 0/403 (0.0%)                  |
| Medical record abstracted <sup>2</sup>                                   | -                 | -                   | -                 | -                             |
| Question of interest collected <sup>3</sup>                              | -                 | -                   | -                 | -                             |
| Missing ability to complete questionnaire                                | -                 | -                   | 0/47 (0.0%)       | 29/403 (7.2%)                 |

<sup>1</sup>If participant was missing cohort, or enrolled at a community venue and missing age, or enrolled at a nursing home and missing a response to whether they were able to complete the questionnaire, it is not possible to determine which Questionnaire or Medical Record Abstraction CRF should have been completed.

<sup>2</sup> Defined as a Questionnaire CRF (or Medical Record Abstraction CRF, as appropriate) with a non-missing 'Date of questionnaire administration'.

<sup>3</sup> Defined as a non-missing response to the question 'in the past month, have you interacted in person or through direct physical contact, such as touching, hugging, or shaking hands, with someone who recently tested positive for COVID-19?'
