

MEMORANDUM

Date: 18-September-2008
To: MTN 015 Protocol Team
RE: **Guide to MTN 015 Reports**

The following is a summary of reports currently available for MTN study 015.

Enrollment Report

The enrollment report summarizes current enrollment data by study site. Because this study is for follow-up of HIV infected participants from other MTN studies which may be currently in progress, only the percentages of eligible enrollees are presented.

Definitions:

- *Site Activation Date* – the earliest date a study site may begin enrollment
- *% of Eligible Enrolled* – the percentage of eligible participants who have enrolled into study 015
- *Time from Sero-conversion to Enrollment* – the duration in days from HIV infection in the parent protocol to enrollment into study 015

Please note that this report will be expanded to include retention data in the future as data collection progresses.
