

MTN-042B

1. Study Assigned Maternal Patient ID (PTID)

(Assign PTID and record facility-assigned medical record number on link log per site SOPs.)

Delivery Data

2. Number of infants resulting from this delivery

 1 2 3

3. Date of Delivery

(Only women delivering at the designated facility or admitted to the facility for postpartum care within 7 days of delivery should be included.)

4. Maternal age

4a. Age not documented

 Not documented

5. Gravidity

5a. Gravidity not documented

 Not documented

6. Parity

6a. Parity not documented

 Not documented

7. Did this patient attend antenatal care?

 Yes
 No
 Not documented

7a. If yes, number of ANC visits attended

 1
 2
 3
 4 or more
 Not documented

8. Maternal HIV Status

 Negative
 Positive
 Documented as unknown
 Not documented

9. Was the patient transferred to this hospital for delivery from a different facility?

 Yes No

10. Was the patient transferred from this hospital to a different facility after delivery?

 Yes No

11. Was maternal death documented in chart

 Yes No

Pregnancy Complications

Hypertensive disorders

12. Hypertension Yes No

12a. Hypertension, specify
 Chronic Gestational
 Pre-eclampsia WITHOUT severe features
 Pre-eclampsia WITH severe features
 Eclampsia Not specified
 (Choose one - the most severe diagnosis.)

12b. Hypertension diagnosis
 Diagnosis term recorded in chart
 Diagnosis term not recorded in chart but presumed based on chart review

12c. Hypertension diagnosis presumed rationale

Hemorrhage

13. Post partum hemorrhage Yes No

13a. Post partum hemorrhage diagnosis
 Diagnosis term recorded in chart
 Diagnosis term not recorded in chart but presumed based on chart review

13b. Post partum hemorrhage:
 Rationale for using term not recorded in chart

Infection

14. Fever of unclear etiology Yes No

14a. Fever of unclear etiology diagnosis
 Diagnosis term recorded in chart
 Diagnosis term not recorded in chart but presumed based on chart review (temp >38.5°C)

14b. Fever of unclear etiology:
 Rationale for using term not recorded in chart (temp > 38.5°C)

15. Chorioamnionitis Yes No

15a. Chorioamnionitis diagnosis
 Diagnosis term recorded in chart
 Diagnosis term not recorded in chart but presumed based on chart review

15b. Chorioamnionitis:
 Rationale for using term not recorded in chart

16. Post partum endometritis Yes No

16a. Post partum endometritis diagnosis Diagnosis term recorded in chart
 Diagnosis term not recorded in chart but presumed based on chart review

16b. Post partum endometritis: Rationale for using term not recorded in chart _____

Infant #1

17. Place of infant delivery Current health facility
 At a different health facility
 At a home (private residence)
 Not documented
 (Infant 1)

18. Pregnancy primary outcome Full term live birth (≥ 37 weeks)
 Premature live birth (< 37 weeks)
 Still born/intrauterine fetal demise (≥ 20 weeks)
 Not documented
 (Infant 1)

18a. Still born/intrauterine fetal demise, specify Macerated
 Fresh
 Unknown
 (Infant 1)

19. Mode of delivery Vaginal delivery
 Cesarean delivery
 Other
 Not documented
 (Infant 1)

19a. Vaginal delivery type Assisted delivery (forceps, vacuum)
 Normal, unassisted delivery
 (Infant 1)

19b. Mode of delivery, other specify _____

(Infant 1)

Infant #1 Data

20. Birthweight recorded Yes No
 (Infant 1)

20a. Birthweight in grams _____

(Infant 1)

21. Neonatal death (infant died AFTER delivery within 7 days of life) Yes No
 (Infant 1)

22. Neonatal ICU admission within 7 days of life or transferred to a higher care facility Yes No
 (Infant 1)

23. Congenital Malformations identified at delivery

None recorded
 Yes
 (Infant 1)

23a. Congenital Malformations identified at delivery type (check all that apply)

Cleft lip and/or palate
 Neural tube defects and/or hydrocephalus
 Cardiovascular
 Polydactyly
 Musculoskeletal including clubfoot
 Umbilical hernia
 Esophageal, gastrointestinal, or anorectal
 Genitourinary
 Trisomies
 Natal tooth
 Other
 (Infant 1)

23b. Congenital malformation: other, specify

 (Infant 1)

Infant #2

17. Place of infant delivery

Current health facility
 At a different health facility
 At a home (private residence)
 Not documented
 (Infant 2)

18. Pregnancy primary outcome

Full term live birth (≥ 37 weeks)
 Premature live birth (< 37 weeks)
 Still born/intrauterine fetal demise (≥ 20 weeks)
 Not documented
 (Infant 2)

18a. Still born/intrauterine fetal demise, specify

Macerated
 Fresh
 Unknown
 (Infant 2)

19. Mode of delivery

Vaginal delivery
 Cesarean delivery
 Other
 Not documented
 (Infant 2)

19a. Vaginal delivery type

Assisted delivery (forceps, vacuum)
 Normal, unassisted delivery
 (Infant 2)

19b. Mode of delivery, other specify

 (Infant 2)

Infant #2 Data

20. Birthweight recorded Yes No
(Infant 2)

20a. Birthweight in grams

(Infant 2)

21. Neonatal death (infant died AFTER delivery within 7 days of life) Yes No
(Infant 2)

22. Neonatal ICU admission within 7 days of life or transferred to a higher care facility Yes No
(Infant 2)

23. Congenital Malformations identified at delivery None recorded
 Yes
(Infant 2)

23a. Congenital Malformations identified at delivery type (check all that apply)

- Cleft lip and/or palate
 Neural tube defects and/or hydrocephalus
 Cardiovascular
 Polydactyly
 Musculoskeletal including clubfoot
 Umbilical hernia
 Esophageal, gastrointestinal, or anorectal
 Genitourinary
 Trisomies
 Natal tooth
 Other
(Infant 2)

23b. Other Congenital Malformation, specify

(Infant 2)

Infant #3

17. Place of infant delivery Current health facility
 At a different health facility
 At a home (private residence)
 Not documented
(Infant 3)

18. Pregnancy primary outcome Full term live birth (≥ 37 weeks)
 Premature live birth (< 37 weeks)
 Still born/intrauterine fetal demise (≥ 20 weeks)
 Not documented
(Infant 3)

18a. Still born/intrauterine fetal demise, specify Macerated
 Fresh
 Unknown
(Infant 3)

19. Mode of delivery

Vaginal delivery
 Cesarean delivery
 Other
 Not documented
 (Infant 3)

19a. Vaginal delivery type

Assisted delivery (forceps, vacuum)
 Normal, unassisted delivery
 (Infant 3)

19b. Mode of delivery other, specify

(Infant 3)

Infant #3 Data

20. Birthweight recorded

Yes No
 (Infant 3)

20a. Birthweight in grams

(Infant 3)

21. Neonatal death (infant died AFTER delivery within 7 days of life)

Yes No
 (Infant 3)

22. Neonatal ICU admission within 7 days of life or transferred to a higher care facility

Yes No
 (Infant 3)

23. Congenital malformations identified at delivery

None recorded
 Yes
 (Infant 3)

23a. Congenital Malformations identified at delivery type (check all that apply)

- Cleft lip and/or palate
 Neural tube defects and/or hydrocephalus
 Cardiovascular
 Polydactyly
 Musculoskeletal including clubfoot
 Umbilical hernia
 Esophageal, gastrointestinal, or anorectal
 Genitourinary
 Trisomies
 Natal tooth
 Other
 (Infant 3)

23b. Other Congenital Malformation, specify

(Infant 3)
